

**Full
Circle.**

The power behind wind power.

The independent, multi-brand
O&M service provider.

Welcome to Full Circle Wind Services, the independent, multi-brand turbine operations, maintenance and repair service for every scale of onshore wind operation.

Full Circle means full service and we're setting high standards for the renewables sector with our complete approach to O&M, repair and customer service. Our experienced global teams are dedicated to keeping your turbines operating at optimum performance levels, with a full-scope service approach that includes preventative and corrective maintenance, blade inspection and repair, major component repair and replacement, 24/7/365 remote monitoring and statutory inspections. We have it all covered.

We've built Full Circle to respond flexibly and swiftly, wherever you are located, whatever the brand of turbine, regardless of the scale or mix of brands that make up your

operation. From single turbine owners and community-owned set-ups, to large-scale wind farms, our expert teams understand the pressures owners face, the all-round benefits of a well-maintained fleet and, above all, the need for a fast, expert response you can rely on.

You're in good hands. Each and every member of our team is committed to playing our part to maintain and sustain the transition towards a low-carbon future.

We look forward to working with you.

Billy Stevenson, CEO, Full Circle

Operational excellence.

→ Outstanding personal service.

Full Circle was built upon 20 years of market-leading wind turbine expertise. With an outstanding global fleet availability above 98.5%, we combine OEM best practices and engineering capabilities with the agile, personal approach of an independent service provider, to offer first-class, holistic maintenance and repair for all scales of operation and multiple brands.

The Full Circle group is backed by comprehensive investment from AtlasInvest, and has service entities in the UK, the Netherlands, Italy, France and Greece, with plans to grow further across Europe, North America and Asia.

Best-in-class technical and operational support.

Generating peace of mind.

Full-scope service

Full Circle's full-scope cover, including major component repair and replacement, gives you total peace of mind, and our O&M agreements can be tailored to suit your requirements.

Regular maintenance. Less downtime, more output.

Even a small fault or breakdown can have a big impact on your bottom line. Our regular, scheduled turbine maintenance ensures less downtime and maximises annual production and revenue.

Corrective maintenance. For when things don't go to plan.

We offer extensive and experienced engineering support and in-house supply chains for fast, flexible and tailored solutions: from minor repairs, to blade and major component replacement.

24/7/365 remote monitoring. Prepared for anything.

Our control room monitors and analyses turbine data 24/7, year round, providing remote maintenance and alerting our teams when performance strays outside normal parameters. This guarantees the earliest possible response and minimises downtime. Based on performance data, we schedule regular maintenance and diagnose and resolve common issues.

Blade & tower inspection & repair. Nothing left unsolved.

Full Circle's fully certified, dedicated, expert teams offer complete blade and tower inspection, maintenance and repair services. Our autonomous drones inspect any wind turbine structure in minutes, performing repeatable data acquisition for high-quality, predictive analysis, for speedier diagnostics, consultation and swift resolution, and huge cost reductions.

Statutory inspections. We've got you covered.

The safety and compliance of your turbines is paramount. Our statutory inspection team stay on top of current and local legislation to ensure you remain compliant and don't get caught out on technicalities.

Supply confidence

Resilient supply chains for the future.

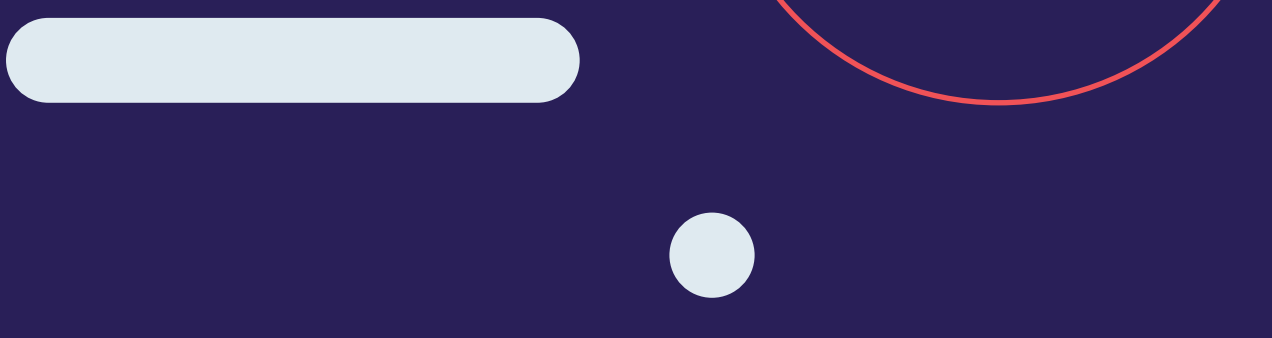

From the pressures of the pandemic, to political or market turbulence and major climate events, supply chains have had to toughen up over the past decade. Our team is dedicated to building future-proof, resilient supply chains, supported by market insights, industry experience and the latest digital systems technology.

Health & safety first

Health, safety and the environment are our top priorities.

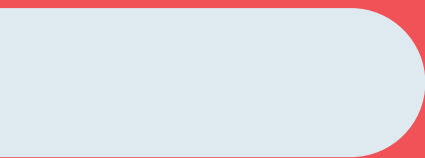

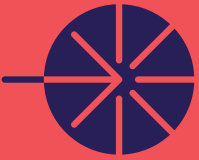

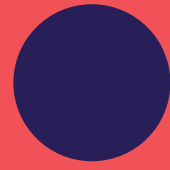

We aim to achieve an objective of zero harm, based on the belief that all harm is preventable. We are committed to the elimination of hazards and the reduction of risk of harm in occupational health, safety and the environment by having robust risk management processes. At Full Circle we encourage worker participation in quality, health, safety and environmental programmes to ensure they can fulfil and are accountable for clearly defined responsibilities.

The people. The passion.
The power behind
 wind power.
